What does it take to start a company? How do you know if your invention could be the basis for a company? How do you interest investors in your idea to fund the start-up? Where else might you find money and resources? Why do you want to spend time commercializing your technology? Where do you start and who should you talk to? This seminar series will provide students, researchers and faculty with an introduction to their options if they are interested in starting a company. Each seminar will focus on one aspect of the start-up process and the resources that are available to help. Pizza will be provided.
