Descriptive Summary

Repository: Lamar Soutter Library, Office of Medical History and Archives, University of Massachusetts Medical School

Identification: SC 12

Creator: Union Medical Association

Title: Union Medical Association Papers

Date(s): 1758 - 1858

Quantity: approximately 38.5 GB (2007 files)

Abstract: The Union Medical Association was officially established at Blackstone Village, Mendon, Massachusetts, on May 12, 1834 by local doctors Hiram Allen, Abel Wilder, Metcalf Marsh, Ariel Ballou and Moses D. Southwick. The goal of the Union Medical Association was to maintain and advance the medical knowledge of its members. This collection includes reports and transcripts of lectures on interesting medical cases, new remedies, medical ethics, and statistics created from 1834 to 1858 by the Association’s members. Also included in this collection are autograph letters of different French, English, and American physicians dated 1758 - 1836. Currently, the papers of the Union Medical Association are the part of the Worcester District Medical Society collection housed at the Worcester Historical Museum.

Access Restrictions: Access to material in the digital collection is unrestricted. The physical materials of the Union Medical Association are housed at the Worcester Historical Museum and constitute Series 4 (Autograph Letters) and Series 5 (Physician Letters) of the Worcester District Medical Society collection. Please contact the Worcester Historical Museum regarding access to the physical collection.

Biographical/Historical Note:

The Union Medical Association (UMA) was officially established at Blackstone Village, Mendon, Massachusetts, on May 12, 1834 by local doctors Hiram Allen, Abel Wilder, Metcalf Marsh, Ariel Ballou, and Moses D. Southwick. This organization became one of many small medical societies of Massachusetts and united under its roof physicians mostly from Mendon, Milford, and Blackstone. The Association created its own Constitution, By-Laws, and regulations. Any professionally trained physician could become an Association member and was required to pay a membership fee and actively participate in monthly meetings that usually took place in the office of one of the members. The Association’s president, secretary and treasurer were elected every six months and their duty was to manage the ongoing needs of the Association. The goal of the UMA was to maintain and advance the medical knowledge of its members. The Association was active for about 25 years and ceased to exist sometime between the late 1850s and early 1860s. UMA physicians most likely became full-standing members of the Worcester District Medical Society (WMDS): for example, the list of presidents of WDMS states that Dr. Moses D Southwick served as a Society’s president from 1866 to 1869. We have no direct evidence about what happened to UMA after 1858.

Below is the list of active members of the Union Medical Association from 1834 to 1858:

Adams, Nathan
Allen, Hiram
Ballou, Ariel
Bliven, Jeremiah P.
Briggs, Tyler

The constitution of the Union Medical Association (file UMA2Sconstitution).
Scope and Content: The bulk of this collection contains autograph letters of English, French and American physicians, dated 1758 – 1836, and physician lectures, transcripts, meeting reports, and miscellaneous materials created by members of the Union Medical Association from 1834 to 1858.

Series and Subseries in the Collection: The collection is arranged in two series. The series in the collection are as follows:

Series 1: Autograph letters

Series 2: Physician lectures and Reports

Series 1: Autograph letters

Scope and content: This series includes 26 original letters of English, French and American physicians, dated 1758 - 1836. Approximately one third of those letters were acquired from “Maggs Brothers rare books, prints and autographs” and “James Tregaskis, the Caxton Head” of London, England. The source of other letters is unknown. Notable authors of some of the letters include Baron Jean Nicholas Corvisart des Marets, the favorite physician of the Emperor Napoleon Bonaparte; Edward Jenner, an English physician and scientist who pioneered the smallpox vaccination; and Benjamin Rush, a signer of the Declaration of Independence and a leading physician of the early Republic.
