The services that the library provides to the research community of the University have changed dramatically over the past several years. Many labs are in buildings separate from the library. As a result, we constantly strive to reach out to other parts of the University. We try to identify potential need for an information service in new areas, to meet in hospitals and at clinics, as well as to new groups never reached before.

Today we also manage a number of applied research projects and develop online journals. We help individual researchers and departments originate and police their research beyond the walls of the Medical School, archiving the publications and journals that are developed. We support the Center for后悔us, which is a highly interdisciplinary research center focused on understanding the impact of such rare diseases as Pompe's disease on patient care. We also provide education and services at the hospital level. Based on knowledge management strategies, resources are made available and eScience resources are provided to researchers in ways that stimulate innovations in biomedical knowledge management.

The NER Update features success stories about the library and its resources. This section also provides information and resources for the community in order to maintain and sustain the relationships with our patrons. The NER Update provides for the opportunity to evaluate the health professionals, health educators, librarians, school faculty, and students who work at hospitals, universities, and other health care providers. The goal is to assess health information use and resource sharing services to health professionals and consumers in the New England states.

OffICE OF MEDICAL HISTORY AND ARCHIVES

In 2011, the Office of Medical History and Archives (OMHA) continued its work to support the Lamar Soutter Library's goal of preserving a valuable historical record that will be available to future generations of researchers. The archivist, Hathy Simpson, project director. To maintain the Partners in Care Collection, we plan to develop and expand a health professional digital library to serve information and discovery needs of health professionals, students, faculty, staff, and laypersons. In 2011, the Office of Medical History and Archives provided for the opportunity to evaluate the health professionals, health educators, librarians, school faculty, and students who work at hospitals, universities, and other health care providers. The goal is to assess health information use and resource sharing services to health professionals and consumers in the New England states.

LAMAR SOUTTER LIBRARY
2011 Membership Report
2011-2012 Academic Year

Welcome to another exciting year at the Lamar Soutter Library. This year we embarked on a journey to solidify our place in the academic community by focusing on our strengths and enhancing our services to better meet the needs of our patrons. We are now one year into our strategic planning process and are so proud of all the progress that we have made, both in service and in scholarship. The Lamar Soutter Library is a community resource that is committed to providing excellence in service and scholarship. We have worked diligently to ensure that our patrons have access to the materials and services that they need to succeed in their academic and professional pursuits.

Director's Message

With Google, Wikipedia, and Facebook, you might ask “who do you need a library for?” It seems like the answer is: “not me.” In today's digital age, you can access a wealth of information simply by using a search engine. However, the library is more than just a repository of information; it is a place where you can find guidance and support to help you navigate the vast array of resources available online. The library provides a space for collaboration, where you can work with others on projects or simply find a quiet place to study. In addition, the library is a place where you can develop critical thinking skills and learn how to evaluate information from a variety of sources. So, while the library may not be necessary in the traditional sense, it is certainly not obsolete. The library plays a vital role in our society and is an essential part of our community. The library is a place where you can go to ask questions, where you can learn, and where you can grow. So, whether you are a student, a faculty member, or a member of the community, you should make the most of the opportunities that the library has to offer. The library is here to support you and to help you succeed.
