Challenging Issues in Community Health: The Role of Research: Paths to Obtaining Funding for Community Engaged Research

Laura L. Hayman, PhD, MSN
UMass Boston

Stephenie Lemon, PhD, UMass Medical School
The UMass CTSA Grant

- **UMass CCTS Community Engagement & Research Section Pilot/Feasibility Grants Program:**
  - These awards focus on community engaged research, defined as “the process of working collaboratively with and through groups of people affiliated by geographic proximity, special interest, or similar situations to address issues affecting well-being of those people (CDC, 1997).
  - Awards can be proposed by faculty from any UMass campus working in partnership with any community organization in the area of translational research related to the improvement of health in real world communities.
  - Intent is for these initiatives to provide a basis for the development of applications to NIH and other funding agencies to carry out larger, more comprehensive studies.
The UMass CTSA Grant

- UMass CCTS Community Engagement & Research Section Pilot/Feasibility Grants Program:
  - The Research can include:
    - Assessment of new methodologies
    - Observational studies
    - Needs assessments
    - Pilot/feasibility studies that use qualitative and/or quantitative data or
    - Initiatives that are spin-offs of existing larger research initiatives if the additional funding addresses unique study aims

Other Potential Sources of Funding for Community-Engaged Research

- University/Institution-based internal grants mechanisms
- Foundations: Robert Wood Johnson Foundation (www.rwjf.org); Spencer Foundation (www.spencerfoundation.org) Fetzer Institute (www.fetzerfoundation.org); Hartford Foundation (www.hartfordfoundation.org)
- Specialty Organizations & Societies Small Grants Program: American Heart Association; American Cancer Society; American Public Health Association; American Nurses Foundation; Sigma Theta Tau
- Massachusetts Department of Public Health
- Agency for Health Care Research and Quality
- Centers for Disease Control & Prevention
Other Potential Sources of Funding for Community-Engaged Research

- National Institutes of Health: www.nih.gov
- 27 Institutes within NIH
  - National Cancer Institute
  - National Heart, Lung and Blood Institute
  - National Institute on Aging
  - National Institute for Nursing Research
  - National Institute on Minority Health & Health Disparities
  - National Institute of Environmental Health Sciences
