Massachusetts Innovative Action to Support those Aging with an Intellectual or Developmental Disability (IDD)

Laney Bruner-Canhoto, PhD; Sharon Oxx, RN, CDDN; Christine J. Clifford, MHP; Emily Lauer, MPH

Background
People with IDD may experience complex age-related issues, including dementia-related disorders, at earlier ages than the general population. To address changing needs, the Massachusetts Department of Developmental Services (DDS) formed a multidisciplinary workgroup of disability and aging-related public and private agency partners. The workgroup explored key areas of age-related needs, including end of life care and services; screenings for onset of age-associated changes and conditions; and innovative models and resources to support aging in community settings.

Nationally, the number of adults with IDD aged 60 and older is projected to double to 1.2 million people by 2030. In Massachusetts, 1 out of every 4 people served by DDS is aged 55 or older.

Brainstorming identified the need for more data and recognition that initiatives must be person-centered. The workgroup also focused on identifying funding sources, existing successful programs, strategies in adapting current environments, and methods to target guidelines and advocacy trainings to families, guardians, and providers.

An examination of DDS health care records for adults aged 55 and older show these adults are more likely to experience hypertension, osteopenia/porosis, diabetes, arthritis, infection, and pneumonia.

Framework to Identify Promising Practices
Health, Aging & Clinical Resources
- Increased clinical consultation resources, developed training resources on Aging and IDD such as nutrition and physical activity

End of Life Care
- Revised the Life Sustaining Treatment Policy, distributed Five Wishes, created training resources on the Medical Orders for Life Sustaining Treatment (MOLST) form and Guardianship

Support & Planning, Community and Work/Retirement Activities
- Created Memory Cafes and innovative day activities, increased collaboration with the Executive Office of Elder Affairs

Aging Work Group – 3 Subcommittees

Promising Practices
Inclusive Memory Cafes: Memory Cafes are meetings where people with dementia and care partners join together to enjoy a variety of activities. In 2016, DDS funded 13 organizations to pilot Cafes that include people with and without IDD and their care partners. Feedback from the inclusive cafes has been positive.

Innovative Day Programs: As people with IDD age, they may want to retire or do something different with their days. DDS funded a pilot for innovative alternatives to traditional day, work or community-based activities. Cooperative for Human Services (CHS) is implementing a program that includes activities in shorter time increments than a traditional day program and a mobile "pop-up" approach. Technology will also play a role with CHS using iPads, Nintendo Wii and Facetime for multi-generational interactions, staying connected, exercise, and entertainment.

Resources for Multiple Audiences
DDS Resources:
- Access to expanded clinical consultations
- Life Sustaining Treatment Policy

Webinars: Includes accessible videos, handouts, and other resources:
- General Aging with IDD
- Aging with IDD and Dementia
- End of Life
- Five Wishes
- Launching a Memory Cafe
- Aging and Disability Resource Consortia
http://shriver.umassmed.edu/cdder/aging_idd_education

End of Life Planning: DDS updated its Life Sustaining Treatment Policy to clarify DDS principles on Informed Choice, Goals of Care, Dignity and Comfort, Hospice and Life Sustaining Technology use, Do Not Resuscitate Orders and other topics relevant to end of life care. In addition, the 5 Wishes document, along with a webinar training focused on how to discuss end of life care, were issued.
