Data Service or Data Collaboration?

- **Data Service**
  - emphasizes & privileges central role of certain types of
    - traditional research &
    - researchers in academia

- **Data Collaboration**
  - emphasizes & privileges central role of certain types of
    - traditional research & potentially emergent forms and digital methodologies
    - librarians as researchers in academia
    - OR as data workers contributing something of different buy equal value (curation, digital platform or database creation, etc.)

For more on influence of this shift within DH and T&P, value of ‘data curation’ projects see Siddiqui N. (2015) *Data Assemblages: A Call to Conceptualize Materiality in the Academic Ecosystem* in DHQ: Digital Humanities Quarterly, 9(2).
Other Models of Collaboration

- Digital Scholarship or Humanities Centers
- Archives & Special Collections
- Researcher/Society Databases & Data Collections
- Museum Collections
- Data Liberation Initiative
- Social Science Data Archives
What is Digital Infrastructure? How Does Infrastructure Impact Research?

Industry/Corporations
Professional Associations
Super Computing
Data/Digital Laborors

Data / Knowledge Workers
Legal & Policy Frameworks
Fiber-optic Networks
Electric Grid
Regional Consortia
National Funders
Political & Economic Context

- National Funders
- Science & Educational Policy
- Globalization 2.0
- Culture Wars
- Reagonomics
- Deregulation
- Open Access Movement
- OECD Signators
- Neoliberal Governance
- Transnational ‘Entities’
- International Treaties
- Fall of Berlin Wall
Futures?

• More People, Professions, Interests
• Context & Scale
• Political and Economic Factors
• Privacy and Data Ethics
• Data as commodity
• Data Work/Digital Labor
• Power Relations in Infrastructure and Data Assemblages
Who defines the problem and decides on the solution? Who is missing from the conversation?

Kouper, Inna et. al. (forthcoming) (Research Data Services Maturity in Academic Libraries.

Thank you!
