Utilizing the Power of Continuous Process Improvement in Technical Services

Lamar Soutter Library, University of Massachusetts Medical School

Goal 1: Monographs from “Order to Shelving”

Major Recommendations:

- ✓ Reduce review period for approval books from 30 to 5 days
- ✓ Do not suppress “on order” records in OPAC
- ✓ Develop a “cataloging on demand” service for newly received books with guaranteed 48-hour turnaround
- ✓ Eliminate duplicative processes

Method

Continuous Process Improvement

- * Many different methods and approaches
- * How can we do things better?
- * Uses “small steps” improvements
- * Eliminate activities that have no value
- * 80/20 rule: often said that processes account for 80% of problems while people account for 20%

One Approach: Value-Added Flow Analysis

- 1 Imagine yourself as the actual thing in process
- 2 Identify steps in the process
- 3 Determine if the steps add value:
 - The customer cares about it and recognizes it is important and correct (important to note that for Technical Services, customers are library staff and patrons)
 - The step physically changes the thing in process (moving/copying doesn't count)
 - The step is done right the first time

Project Goals

Examine the efficiency of work processes in the Technical Services Department, with the goal of reducing the turnaround time by **50% or more** for three specific processes:

1. Monographs from “order to shelving”
2. Implementing serials title changes
3. Handling of journal issues from “receipt to binding”

Goal 3: Handling of Journal Issues from “Receipt to Binding”

Major Recommendations:

- ✓ Discontinue keeping daily check-in statistics manually
- ✓ Develop priority list for binding
- ✓ Estimate binding costs for calendar year and submit in budget request
- ✓ Rubber stamp library name on top edge only of bound volumes
- ✓ Tattle taping a good insurance policy, but investigate reliability of less expensive tattle tape

Pilot Project In Progress: February - July 2004

Goal 2: Implementing Serials Title Changes

Major Recommendations:

- ✓ Develop e-mail or electronic tracking system to be used by staff when title change is identified
- ✓ Test a goal of 10 working days for in-house systems to be updated
- ✓ Encourage staff and patrons to search OPAC for serials information
 - Discontinue manual updating of printed holdings list (print annually)
 - Provide more training and documentation

Title Change Processes

Before Pilot

During Pilot

Conclusions

- * Value-added flow analysis is a useful tool for continuous process improvement
- * We anticipate project goals will be achieved
- * Technical Services better able to serve its internal and external customers
- * Technical Services staff will have more time available for other projects: image database, rare books cataloging, digitization of Clara Barton letters
