INTRODUCTION

The Focus Group was part of a community participatory evaluation in collaboration with the Lowell Teen Pregnancy Prevention Taskforce (TPP), which is facilitated by the Lowell Teen Coalition from the Lowell Health Alliance (LCHC) and is now a subcommittee of the Greater Lowell Health Alliance. The overarching goal of this research is to improve the utilization of teen health services, to increase understanding of how parents and the Lowell community view teen access to reproductive health information and services and teen pregnancy prevention and to highlight non-economic barriers to accessing pregnancy prevention services.

COMUNITIES THAT CARE CONCEPTUAL MODEL

In 2009, Lowell’s teen birth rate was 53 per 1,000 teens age 15-19 as compared to 48.7 in 2008 and more than double the Massachusetts 2009 rate of 19.6. Teens often occur disproportionately to the most vulnerable teens, with racial and ethnic disparities being common. In 2009, births to Asian teens made up 31.8% of teen births, nearly doubling the rate since 1996. Hispanic mothers accounted for 32.4% of all teen births.

PARENT FOCUS GROUP

As part of a comprehensive teen pregnancy prevention assessment, parents of preteen and teens living in the greater Lowell community and working at the LCHC were recruited to discuss issues around teen sexual health and pregnancy prevention.

Purpose

• To develop a means to assess parents’ perspectives about solutions to reduce risk-taking behaviors among adolescents that lead to teen pregnancy
• To determine if parents feel adequate health care services are being provided to address the diverse needs of adolescents related to teen pregnancy prevention

LIMITATIONS & NEXT STEPS

Sample size was limited and only included participants who were employed at the Lowell Community Health Center. However, this forum provided a basis for conducting a community survey involving parents of teens in the residential community of Lowell.

The focus group, a larger community survey and teen health services, to increase understanding of how parents and the Lowell community view teen access to reproductive health information and services and teen pregnancy prevention and to highlight non-economic barriers to accessing pregnancy prevention services.

PARENTS’ PERCEPTION OF WHY TEENS GET PREGNANT

• Peer acceptance/ peer pressure
• Go with the flow
• Means of keeping their mate
• Lack of sexual education
• See no evil, hear no evil mentality
• Today’s parents grew not up talking about sex
• Do not know how to use sexual contraceptives
• Do not know what types of contraceptives services exist
• Resistance to signing parental consent for student attendance in sex ed class
• Teens decline to attend sex ed class because their peers do not attend
• Parents shelter their teen by keeping them home
• Cultural influences trickle down to the next generation inhibiting open discussion of sex and protection
• Girls marry young in certain cultures
• Teen mentality that they are invincible
• Teen denial that they can get pregnant
• Teens’ misconception of sex and pregnancy influenced by media, TV, Internet, magazines, etc.
• Teens misguided with faulty information from friends and media

PARENTS’ PRECEPTION OF BARRIERS TO TEENS’ ACCESSIBILITY OF RESOURCES

• Transportation
• Mobility
• Limited time for organized peer groups for younger teens
• Younger teens tend to go home after school
• Fear of diminished privacy
• Fear of family finding out if they seek help
• Fear of being seen help at a community resource center
• Fear of confidentiality breaking when confiding in counselors
• Schools do not condone passing out condoms
• Loss of services in community resource center due to funding cuts

CHANGES TO IMPROVE ACCESS & PREVENTION OF TEEN PREGNANCY

• Encourage parents to establish open communication with their teens
• Car Talk
• Backyard Sharing
• Discuss with early menses
• Discuss all forms of birth control
• Stress abstinence
• Informal conversation about peers who are pregnant
• Encourage pediatricians to discuss with teens about sex and pregnancy prevention
• Maintain and/or increase services at Youth Build, Utech, and Teen Coalition
• Hold open forums for parents to educate them on the importance of allowing their teens to attend sex ed class in school
• Provide books that stress self worth, i.e. The Caring and Keeping of You
• Normalize the sex ed discussion by discussing with them at a young age because it may decrease embarrassment
