LASIR: Enhancing Open Source Options for IRs

Northeast Institutional Repository Day

Sarah Lippincott // Born-Digital
Islandora Scholar
an existing suite of modules designed to help Islandora 7 function as an Institutional Repository

LASIR
a Mellon-funded initiative to make strategic enhancements to Islandora Scholar and its submodules, with the end goal of creating a turnkey Islandora-based IR platform
Enhancement 1 → Search Engine Optimization
Enhancement 2 → Usage Statistics

**The Team**

- **Noah Smith**  
  CEO / Founder

- **Derek Merleaux**  
  Team Lead

- **Sarah Lippincott**  
  Senior Consultant

- **Patrick Dunlavey**  
  Lead Developer

- **Gavin Morris**  
  Systems Developer
Islandora For All

ISLE + LASIR + Community

a grant from The Andrew W. Mellon Foundation
Islandora for All

ISLE + LASIR + Community

Building community is critical to sustaining an open-source project.

ICG built strong LAC community (Hack/Docs, ISLE, LASIR)

Islandora for All:

1. ICG’s focus on building larger community
2. The ICG is moving towards supporting an environment that includes everyone, and that includes sharing leadership positions.
LASIR: Liberal Arts Sprint for Institutional Repositories

Goal: develop a robust suite of IR features within Islandora through community involvement, coding new features, and creating thorough documentation

Five major areas: SEO and Google Scholar, data visualizations and reporting, improved scholar profiles, self-deposit workflow, and data outputs
ISLE: ISLandora Enterprise

Goals:

- Make stack installation easy so that it lowers the barrier to entry for Islandora/Fedora adoption
- Make maintenance and sustainability easier across a variety of institutions
- Provide a viable open-source repository choice for organizations with smaller staffing levels
Islandora Collaboration Group (ICG)

The Islandora Collaboration Group (ICG) is a group of colleges supporting and extending the Islandora repository through development, resource pooling, and advocacy.

  - Swarthmore College
- Vassar College
- Wesleyan University
- Williams College
Community - Benefits

- Help to minimize risk; greatest strength in numbers
- Targeting resources to steward unique aspects of our institutions
- Small consortial investment yields great rewards
  - Ability to join governance of larger community (e.g., Islandora Foundation)
  - Seats on board of directors, technical, and planning roadmaps
- Investing resources to products and platforms that we need in a way we can sustain
Community - Challenges

- Project Management, relationships and communication.
- Risk management and resource allocation, gaining support from senior leadership for this type of work/system.
- Open source isn’t free. Mitigating needs with both money and staff time are necessary. Sharing across institutions helps.
- Our projects are from primarily white institutions and elite colleges with financial and staffing resources. Potential to increase stakeholders in the development process of open source.
The Future

- Continued sustainable collaboration in the open source repository space.
- Alignment with Islandora 6 and Fedora 8
- Collectively developing migration plans and pathways

- More ISLE members - consider joining!
- More shared development projects
- Increasing Islandora expertise of library staff and software developers
Questions?

Importance of open source in open access

Benefit of having a wide range of participants in building out the tools

Challenges to making community-supported software work well
