New! TL1-Training Program

UMCCTS Pre- and Post-doctoral Fellowship Training Program

Call for Applications

The UMass Center for Clinical and Translational Science received its first Clinical and Translational Science TL1 Training grant under the direction and senior leadership of Drs. Silvia Corvera and Kate Lapane. The TL1 will engage pre- / post-doctoral fellows in training across the entire translational spectrum (T0: bench science, T1: translation to humans, proof of concept, phase 1 trials; T2: translation to patients: phase 2 and 3 trials; T3: diffusion to clinical practice, Phase 4, outcomes; and T4: population-based outcomes research) to participate in a common clinical and translational science program on our UMMS campus.

The TL1 program seeks to:

- Train and nurture highly qualified pre-doctoral and post-doctoral trainees through the provision of a novel, multifaceted, rigorous TL1 program in clinical and translational research;
- Provide trainees with strong mentoring teams, rigorous academic training tailored to their research interests, and technical skills necessary to ensure success as independent investigators and contributors to team science; and
- Provide “hands on” research experience within transdisciplinary teams building on the strengths of current linkages between UMass Departments, Centers, and Institutes.
The Pre- and Post-doctoral Fellowship (TL1) Training Program is requesting applications from trainees who wish to become part of this exciting new program, at either the postdoctoral or predoctoral (graduate student) levels. Note: T0 only projects will not be part of this program.

**Deadline date for Applications:** Friday, October 23, 2015

[Click here](#) for complete information and to apply.

**Questions?** Please contact [Nathaniel.Hafer@umassmed.edu](mailto:Nathaniel.Hafer@umassmed.edu)
NEW! UMCCTS Community Research Innovative Scholars Program (CRISP)

Call for Applications

The UMCCTS Community Research Innovative Scholars Program (CRISP) is pleased to announce a call for applications to this new and innovative program.

The goal of the CRISP is to support the development of independent UMass researchers who conduct community engaged research. Community engaged research involves collaborative research with community partners along the translational research continuum.

**Deadline date for Applications:** Monday, November 9, 2015

[Click here](#) for complete information and eligibility for this innovative program.

Questions? Please contact [Amy.Borg@umassmed.edu](mailto:Amy.Borg@umassmed.edu)
UMMS Human Research Protection Education Program
New IDC-10 Version

Margaret Koziel, MD, Assistant Vice Provost, Clinical Research

On October 1, the coding system for medical diagnoses and inpatient procedures, the International Classification for Diseases (ICD) will undergo a major revision from the current version (ICD-9) to a new version that is substantially different in structure, composition and level of details. This will have major implications for registries, medical record searches, case report forms and virtually all research that uses diagnostic or inpatient procedure codes for any patient records that cross the October 1, 2015 date.

While many clinicians will have received training with respect to the implications for clinical practice, we have created a brief (15 minute) Power Point presentation targeted at clinical research professionals and researchers who 1) have not had any exposure or training on the ICD-10 transition, and/or 2) feel like they need additional information as to the potential impact of the transition on the conduct of human research. The presentation can be viewed with or without audio.

Please visit the HRPP Education website and look for the Newest Information box to access the presentations:

Questions? Please contact Margaret.Koziel@umassmed.edu or Jesica.Pagano-Therrien@umassmed.edu
UMass Medical School Acquires Oncore Clinical Trials Management System

Jomol P. Mathew, PhD, Associate CIO & Head of Research Computing & Data Innovation, Information Technology, UMMS

On September 30th, 2015, the UMass Medical School reached an agreement with Forte Research System, Inc. to license OnCore enterprise research software to support our clinical trials management operations. The system will allow PIs, study teams and administrators to use a unifying system to facilitate clinical trial billing, ensure compliance, increase transparency and provide rapid access to data on enrollment, subject calendars and other important data. The system will provide clinical trial budgeting capabilities, enable monitoring of milestones, and invoicing. Additionally the system will help in auditing and reporting. As the UMass Memorial Health Care implements EPIC, Oncore will be integrated with EPIC so that care providers will be able to see patient’s enrollment in protocols - an important step towards improving patient safety.

The implementation is currently scheduled to kick off towards the end of 2015, with adoption by study teams in mid-2016.

---

New Clinical Data Portal

Jomol P. Mathew, PhD, Associate CIO & Head of Research Computing & Data Innovation, Information Technology, UMMS

UMass Medical School Research Computing recently launched the Clinical Data Portal to provide a single gateway for UMMS research community of clinicians and researchers to access clinical data. The website lays out the different requirements of accessing de-identified clinical data and clinical data with protected health information. One of the new self-service features offered allows PIs to complete a detailed clinical data request for patient demographics, diagnosis, procedures, medications and lab results without having to make a phone call or email. More clinical and research data types and self-service features will be added to the portal in the future.

The UMMS Human Research Protection Program also provides a link to the Clinical Data Portal on their website, left navigation column.
HHS Announces Proposal to Improve Rules Protecting Human Research Subjects

Changes proposed to ensure the highest standards of protections for human subjects involved in research, while enhancing effectiveness of oversight

The U.S. Department of Health and Human Services and fifteen other Federal Departments and Agencies have announced proposed revisions to the regulations for protection of human subjects in research. A Notice of Proposed Rulemaking (NPRM) was published in the Federal Register on September 8, 2015. The NPRM seeks comment on proposals to better protect human subjects involved in research, while facilitating valuable research and reducing burden, delay, and ambiguity for investigators.

There will be several in-person or webinar meetings to inform the public about the proposed changes to the federal policy for the protection of research volunteers.

Click here to be directed to the HHS webpage for complete information, registration, and webinar links.
UMCCTS User Satisfaction Online Survey

The goals of the UMass Center for Clinical and Translational Science (UMCCTS) are to accelerate the translation of basic discoveries into practical, cost effective solutions that improve human health and to develop and support the next generation of leaders in clinical and translational research.

The UMCCTS provides numerous programs and services towards these efforts. Your feedback and comments via this survey help us to continually strive to make these services the best, most valuable and most relevant to our users/members.

Thank you for taking a few moments to take this survey.

Please click here to be directed to the survey.
The UMass Center for Clinical and Translational Science is part of the Clinical and Translational Science Award (CTSA) program funded by the National Center for Advancing Translational Sciences (Grant # UL1-TR001453) at the National Institutes of Health (NIH).
NLM Announces Inaugural Annual Donald Lindberg and Donald King Lecture

The National Library of Medicine (NLM) is pleased to announce the first annual Donald A.B. Lindberg & Donald West King Lecture, co-sponsored by the NLM, Friends of the National Library of Medicine and the American Medical Informatics Association.

CONTINUING MEDICAL EDUCATION
At the conclusion of this activity, participants will be able to:
• Learn scientific methods and cause and effects of immune alterations.
• Learn molecular and cellular basis of normal and impaired immunity.
• Learn normal responses to foreign antigens and strategies to circumvent the responses.

Accreditation Statement: This activity has been planned and implemented in accordance with the Essentials Areas and policies of the Accreditation Council for Continuing Medical Education. The University of Massachusetts Medical School is accredited by the ACCME to provide continuing medical education for physicians.

Designation Statement: The UMMS designates this live activity for a maximum of 1 AMA PRA Category 1 credit(s) ™. Physicians should claim only credit commensurate with the extent of their participation in the activity.

Statement on Faculty Disclosure: It is the policy of the University of Massachusetts Medical School to ensure fair balance, independence, objectivity and scientific rigor in all activities. All faculty participating in CME activities sponsored by the University of Massachusetts Medical School are required to present evidence-based data, identify and reference off-label product use and disclose all relevant financial relationships with those supporting the activity or others whose products or services are discussed. Faculty disclosure will be provided in the activity materials.
Dr. Robert Sege is Vice President of the Medical Foundation Division at Health Resources in Action, which directs several of the region’s most influential health-related private foundation grant programs. In 2014, they managed 11 client grant programs, including the Charles H. Hood Foundation, Charles A. King Trust and the Smith and Klarman Family Foundations which:

- Awarded approximately $17.7M
- Made awards to 63 basic and 22 physician scientists at 50 research institutions
- Funded numerous disciplines, including biochemistry, nanotechnologies, preclinical animal disease models and clinical outcomes research

Wednesday, October 14, 2015
12:00pm – 1:00pm*

Presented by Robert Sege, M.D., Ph.D., FAAP

Vice President, Medical Foundation Division at Health Resources in Action and Professor of Pediatrics at Boston University

Lunch will be provided- please RSVP to Karen.Gardiner@umassmed.edu
Dr. Luzuriaga to deliver lecture on October 15 on HIV as part of Fairman Cowan Lecture Series

Article from the UMass Med Now September 30, 2015 issue

Katherine Luzuriaga, MD, the UMass Memorial Professor of Biomedical Research, Professor of Molecular Medicine, Pediatrics, and Medicine, Vice Provost for Clinical and Translational Research and Global Health, and Director, UMass Center for Clinical and Translational Science, will present the Tenth Fairman Cowan Collegiate Lecture, sponsored by the Worcester Regional Research Bureau.

Thursday, October 15, 2015
5:30 pm
Albert Sherman Center, The Cube (3rd Floor)
University of Massachusetts Medical School, Worcester

Dr. Luzuriaga will discuss advances and challenges in eradicating pediatric HIV infection, based on her nearly three decades of research in the field of HIV and pediatric immunology.

The Research Bureau serves the public interest of Greater Worcester by conducting independent, non-partisan research and analysis of public policy issues to promote informed public debate and decision-making. For 30 years, the Research Bureau has worked to protect the public interest in by identifying issues, investigating impacts, and educating the public and government officials about opportunities and best practices.

The Fairman Cowan Lectures are a yearlong series at Worcester’s colleges designed to be an accessible and timely introduction to interesting topics taught or researched on local campuses. Cowan was the former general counsel for the Norton Co. who founded a number of Worcester civic institutions, including what was then called the Worcester Municipal Research Bureau.

The lecture will be followed by a reception.

Seating is limited, RSVP to info@wrrb.org

UMMS Human Research Protection Education Program

Clinical Research Professionals Group

The Clinical Research Professionals Group (CRPG) consists of clinical research staff throughout the University of Massachusetts Medical School (UMMS), including Principal Investigators, Study Coordinators, Research Nurses, Administrators, and others. All research staff are invited to be part of the CRPG regardless of their role or background in clinical research.

CRPG meets once per month. Meetings are a forum for presentations and discussion on a variety of topics, including:

- enhancing the protection of human subjects in research
- best practices in clinical research
- policies and procedures related to the implementation of human subjects research

If you are interested in being part of the CRPG to receive important announcements, please email HRPeducation@umassmed.edu to be added to the email distribution list.

Richard A. Perugini, MD
Nancy Morris, PhD, ANP
Pranoti Mandrekar, PhD

Tuesday, October 20th
Lunch at 12 Noon
Seminar from 12:20-1:30

Amphitheater I
(UMMS S2-102)

Sponsored through funding by the UMMS
Interprofessional Education Grant (IPEG) Program
and the GSBS Program in Translational Sciences.
This presentation will review key considerations for medical device startups during product development. Topics include connecting regulatory and business strategies, interacting with the FDA and Notified Bodies, and updates on recent industry changes (e.g., ISO 13485, IVDR and FDA regulation updates).

Those who should attend:

The topics discussed are relevant to experienced medical device professionals as well as those new to the industry. This seminar is designed for those who need a better understanding of the regulatory requirements surrounding medical devices. Those with backgrounds in the pharmaceutical or biotechnology industries, scientists, engineers and technicians working on device design and development, product managers, business development managers, marketing professionals, QA/QC personnel, regulatory affairs professionals, and investment and acquisition specialists will all benefit from this seminar.
Registration Fee first 20 people: $10.00
Registration until October 19, 2015: $20.00
Registration Fee October 20, 2015: $30.00
LEARNING ABOUT THE IND/IDE PROCESS AND REIMBURSEMENTS FOR NEW DRUGS AND DEVICES

WHEN
October 23 2015

WHERE
Colloquium Room
Boston University
Photonics Center
8 St Mary's Street
Boston, MA

www.bu.edu/cftcc

SPEAKERS
Erin O'Reilly, PhD, RAC
Assoc. Director, Regulatory Affairs
Duke Translational Medicine Institute

Erika Segar Johnson, PhD, RAC
Regulatory Affairs Scientist,
Duke Translational Medicine Institute

Jo Ellen Slurzberg
VP Global Health Policy
JR Associates

TARGET AUDIENCE: Clinical investigators, sponsor-investigators, and others on the study team responsible for submitting and maintaining FDA IND and/or IDE applications; regulatory affairs professionals; IRB staff. Clinicians, students, academicians, nurses, and small companies are welcome to attend.

EDUCATION GOALS
To introduce the basics of filing an Investigational New Drug (IND) Application with the FDA
To introduce the basics of filing an Investigational Device Exemption (IDE) Application with the FDA
To introduce the basics of reimbursement (coverage, codes, and payment) as these processes intersect in the current and evolving healthcare environment, including aspects of the Affordable Care Act, and will focus on creating an implementable strategy for a product so it can be successfully commercialized.

Measuring Outcomes and Process in Community Based Participatory Research (CBPR)

Thursday October 29th, 12:15-1:30pm Alumni Hall

Dr. Bonnie Duran, Director of the University of Washington Center for Indigenous Health Research, will discuss her experience implementing and sustaining community-based mechanisms to address health disparities. Dr. Duran has worked in public health education, evaluation, program planning and research with Native Americans and other communities of color for 35 years. Her work focuses on designing treatment and prevention efforts that are empowering, culture-centered, effective and sustainable, with maximum public health impact.

“(…) there is so much knowledge and wisdom to be learned from our community partners. Being open to that bi-directional and multi-directional learning is really important. Also, a little bit of cultural humility is important. We can’t think that since we have these fancy academic titles, we somehow are smarter or know what’s best for a community.”

Excerpt from an interview with the Robert Wood Johnson Foundation (July 2015)

Dr. Linda Silka is a social and community psychologist by training, with much of her work focusing on building community-university research partnerships. She has several decades of experience in leading community-university research partnerships on environmental, economic development, and environmental health issues.

PROGRAM

12:15pm Arrival & light refreshments
12:30pm Welcome and Introductions
12:35pm Community-University Research Partnerships: Dr. Linda Silka
1:00pm Outcomes and Process in Community Based Participatory Research, Dr. Bonnie Duran

ALL ARE WELCOME TO ATTEND

Please spread the word to your colleagues and students. Light refreshments will be served.

For additional information contact Professor Maria Brunette, Maria_Brunette@uml.edu.

From Chemical to Drug – The Path to a Small Molecule IND
Best Practices When Filing Small Molecule Investigational New Drug Applications

Speakers:
Michelle Browner | Platform Innovation & Partnership Management, Johnson & Johnson Innovation
Mark Kao | Scientific Director, Janssen R&D
Mark Krook | Sr. Scientific Director, Portfolio Management, Janssen R&D
Kenneth Turner | Sr. Scientific Director, Quantitative Sciences, Janssen R&D
Katherine Tsokas | Sr. Director, Global Regulatory Affairs, Janssen R&D

Do you have a solid plan to achieve IND acceptance? Filing an Investigational New Drug (IND) application might be the next step in advancing your early-stage drug development idea. Johnson & Johnson Innovation, JLABS, and Janssen Discovery Sciences invite you to an in-depth look into the process of filing an IND. Whether your goal is to develop a pipeline through commercial launch or partner as early as possible, submitting an IND is a critical early milestone for every biotech project. With big Pharma and VC firms competing for the most promising compounds, startups are expected to demonstrate a clear blueprint for IND approval, and we want you to be ready.

Gairdner Lecture Series
Lecture by the 2016 Gairdner Global Health Awardee
The Consortium of Universities for Global Health (CUGH) is a rapidly growing Washington, DC based organization of over 130 academic institutions and other organizations from around the world engaged in addressing global health challenges. CUGH was established in 2008 with generous funding from the Bill & Melinda Gates Foundation and The Rockefeller Foundation.

Mission
To build interdisciplinary collaborations between universities and other sectors to facilitate the sharing and implementation of knowledge to strengthen academic global health programs and address global health challenges. CUGH works across education, research, and service. It is dedicated to creating equity and reducing health disparities, particularly in low-income settings. CUGH promotes mutually beneficial partnerships between universities and other sectors in developed and developing countries to strengthen human capital and institutional capabilities. It is committed to translating knowledge into action.

Vision
Making the university a transforming force in global health.

Activities
Impact
Working to bridge the knowledge-needs gap by increasing access to innovations that can address global health challenges; fostering the dissemination and implementation of evidence-based high impact interventions; facilitating effective partnerships between institutions in high and low income countries and between them and governments, foundations, NGOs, and the private sector to achieve these goals.

Advocacy
Creating policy-related information, tools, events, and partnerships to support global health institutions and the sustained growth of members’ programs and activities.

Capacity Building
Utilizing the capabilities in academic institutions to help build capacity across disciplines in low-income communities and institutions.

Education
Developing interdisciplinary educational curricula, and resources. CUGH is a resource center for information, materials, and services that support global health education, research, and service activities.

Enabling Systems
Facilitating inter-university information exchanges and developing global operational tools and resources that will strengthen university-based global health programs.

Communications and Information Resources
A global health information hub (cugh.org) has been created for the academic community, policymakers, the private sector, NGOs, and the public. Information about educational materials, forums, best practices, policy updates, training modules, funding, research opportunities, and other relevant content across disciplines is available on the site.

Membership
CUGH now accepts both individuals and institutions as members. To learn about CUGH membership, please visit CUGH.org/join or contact membership@cugh.org.
UMCCTS-Voyager Therapeutics Special Pilot Project Program 2015

Call for Letters of Intent

The University of Massachusetts Center for Clinical and Translational Science (UMCCTS), in collaboration with Voyager Therapeutics, is pleased to announce a call for letters of intent for a special round of Pilot Project Programs focused on understanding and optimizing recombinant adeno-associated viral (rAAV) vectors for therapeutic use.

Voyager Therapeutics is developing gene therapies for fatal and debilitating diseases of the central nervous system (CNS). Voyager’s current lead programs include Parkinson’s disease, Amyotrophic Lateral Sclerosis (ALS), Friedreich’s ataxia, Huntington’s disease, and additional indications. Voyager is committed to advancing the field of AAV gene therapy by innovating and investing in areas such as vector optimization and engineering, and dosing techniques, as well as process development and production.

Letters of intent are due on or before, Friday, November 13, 2015

Click here for complete details and information available on the UMCCTS website.
The UMASS-Chemical Screening Initiative

Call for Proposals

Purpose of the Program

The UMASS-Chemical Screening Initiative (UMASS-CSI) provides investigators access to experienced professional and state-of-the-art technological resources at the Small Molecule Screening Facility (SMSF) for the discovery of exceptional chemical probes, potential diagnostic and therapeutic candidates of high-impact, as well as research tools. The program is funded by the UMass Office of the President’s Science and Technology Fund and the UMass Center for Clinical and Translational Science.

Executive Summary

• To permit the discovery of high-impact chemical compounds with therapeutic benefits in the academic setting
• To provide drug screening and development support to 10 meritorious projects from across the UMass system
• Facilitate external funding
• Facilitate industry-academia collaborations by demonstrating ‘drug-ability’ of biological targets
• Generate intellectual property for UMass

Objective of this Call for Proposals

The objective of this announcement is to invite applicants with a well-developed assay used in basic research and therapeutic development programs suitable for HTS to submit the assay for consideration by the UMASS-CSI to identify hits and probes from the SMSF compound library.

Five, Tier 1 projects encompassing pilot experiments would be awarded $7,250 each for screening any library of choice, up to a total of 5,000 compounds (e.g., a partial diversity set and/or a combination of the LOPAC and international drug collection to name a few).

Five, Tier 2 projects would involve comprehensive screening of the entire 58,000 compound library. These five Tier 2 projects would be awarded $22,500 each.
In both cases, the awards would cover all costs involved. These awards would cover not only assay development and high throughput screening costs but also secondary and counter screening, hit validation, compound picking, and consultation with medicinal chemists at UMass Amherst (Dr. Sergey Savinov) and the Structure-based Drug Design core at UMASS Medical for further developing these compounds into potential therapeutics.

Sangram S. Parelkar, PhD, who is the manager of the SMSF and has broad expertise in drug discovery and development, would be responsible for assay development and all aspects of screening. Paul Thompson, PhD, the SMSF Core Director, will also provide input into assay design and compound prioritization.

Please direct any questions to Drs. Thompson and/or Parelkar.

**Key Dates:**

- Call open: 09/15/2015
- UMASS-CSI team available for questions and project mentoring from 09/15/2015
- **Proposal Deadline:** Thursday, October 15, 2015 at 5:00 pm EST
- Awards announced on or about 11/30/2015

[Click here](#) for complete details that are available on the UMCCTS website.
Pfizer’s Centers for Therapeutic Innovation

Call for Proposals for: Biotherapeutic Targets and Small-Molecule Accelerator

Pfizer’s Center’s for Innovative Therapeutic Innovation (CTI) call for proposals will include 3 opportunities:

- Large molecule therapeutics
- Small molecule therapeutics
- A new focused program called the CTI Small Molecule Accelerator (SMA)

Pre-Proposal Deadline: Friday, October 16, 2015

If interested in applying for this funding opportunity, the UMass Center for Clinical and Translational Science has posted the Call for Proposals on our website.

Click here for complete information.

All researchers and clinicians whose work meets these criteria are invited to apply. Please submit pre-proposals to Nate Hafer (nathaniel.hafer@umassmed.edu) by October 16, 2015.

For more information, please contact Venkat Reddy (Venkateshwar.Reddy@pfizer.com) or Nate Hafer (Nathaniel.Hafer@umassmed.edu)
Alliance for Cancer Gene Therapy (ACGT) is pleased to announce its 2015 Investigator’s Award in Clinical Translation of Cell and Gene Therapy for Sarcoma.

For complete information please go to: http://www.acgtfoundation.org/grants-and-research/research-grants/

The Doris Duke Charitable Foundation Announces 2016 Clinical Scientist Development Award Competition

Pre-proposals are being sought from junior physician-scientist faculty conducting clinical research in any disease area. It is recommended that applicants have significant research experience and strong publication records consistent with the rank of assistant professor.

The Clinical Scientist Development Award does not require institutional nomination. This competition employs a two-stage process.

Pre-proposals will be reviewed and up to 50 applicants will be invited to submit a full proposal.

In keeping with the wishes expressed by Doris Duke’s will, experiments that use animal or primary tissue derived from animals will not be supported by this program.
For complete details, please visit the [Clinical Scientist Development Award web page](https://escholarship.umassmed.edu/umccts_news/vol2015/iss9/1).

### 2016 Pilot Grant Application Open

The Center for the Promotion of Health in the New England Workplace (CPH-NEW) Pilot Grants Program awards researchers small grants of up to $11,000 each to conduct preliminary studies or demonstration projects.

Projects must relate to the CDC National Institute for Occupational Safety and Health "Total Worker Health" mission - the integration of occupational safety and health with workplace health promotion to advance health, safety and well-being of workers.

Investigators eligible for pilot project support include:

- Graduate students at accredited academic institutions
- Post-doctoral trainees, including physicians and nurses and those in medical residency programs
- Faculty members, visiting scholars, and research staff at accredited academic institutions
- Other individuals from community or non-academic institutions who have a demonstrated interest and research capability in relevant fields

Visit the [CPH-NEW Pilot Grant Program](https://escholarship.umassmed.edu/umccts_news/vol2015/iss9/1) website.

### Pilot Grant Deadlines

- The letter of intent is due by **October 30, 2015**.
- The full application is due by January 8, 2016 (by invitation only).

### Be Inspired By Past Projects

### Winning Strategies Webinar

Listen to Dr. Stephanie Lemon’s webinar, "**Winning Strategies for CPH-NEW Pilot Grants.**" Successful grant writer and Associate Professor at UMass Medical School, Lemon shares her grant writing tips and insights into the Pilot Grant Program.
The Bill & Melinda Gates Foundation is inviting applications that address specific challenges defined in the grant programs below. For details and application instructions, please visit the new [Grand Challenges website](#). Please note that descriptions of the challenges will soon be available on the website in Chinese, French, Portuguese and Spanish.

1) **Grand Challenges Explorations** is seeking innovative global health and development solutions and is now accepting proposals for its latest application round. Applicants can be at any experience level; in any discipline; and from any organization, including colleges and universities, government laboratories, research institutions, non-profit organizations, and for-profit companies. Initial grants will be US $100,000 each, and projects showing promise will have the opportunity to receive additional funding of up to US $1 million.

Proposals are being accepted online until **November 11, 2015** for the following challenges:

- [Novel Approaches to Characterizing and Tracking the Global Burden of Antimicrobial Resistance](#)
- [Explore New Solutions in Global Health Priority Areas](#)
- [Addressing Newborn and Infant Gut Health Through Bacteriophage-Mediated Microbiome Engineering](#)
- [Explore New Ways to Measure Delivery and Use of Digital Financial Services Data](#)

2) **New Interventions for Global Health: Vaccine Manufacturing**. This challenge focuses on innovations in vaccine manufacturing platforms designed to lower production cost for vaccines that target diseases of great global burden and that are among the most costly to produce with current technologies.

Letters of Intent will be accepted until **November 5, 2015**. Read more about this grant opportunity [here](#).

3) In addition, the [African Academy of Sciences](#) and the [New Partnership for African Development](#) have launched [Grand Challenges Africa](#) in Nairobi, Kenya. This program joins others within the Grand Challenges family of grant programs supported by the Bill & Melinda Gates Foundation and its partners. Grand Challenges Africa will build on the global success of Grand Challenges programs in India, Brazil, and South Africa, as well as the strong base of Africa Grand Challenges grantees already funded by the Bill &
Melinda Gates Foundation, Grand Challenges Canada, and USAID. For more information please visit AAS.

We look forward to receiving innovative ideas from around the world and from all disciplines. If you have a great idea, please apply. If you know someone else who may have a great idea, please forward this message.

Furthermore, as a forum for sharing ideas, pursuing new opportunities and keeping abreast of new developments in the field of global health, The Gates Foundation together with Grand Challenges Canada has set-up a LinkedIn group. All you need to join is a free LinkedIn account - go to Global Health Innovations and click "Join"

Thank you for your commitment to solving the world’s greatest health and development challenges.

The Grand Challenges Team
Indo-US Research and Teaching Professorships

Apply Today!!

Sponsored by the Indo-US Science & Technology Forum and managed by the American Society for Microbiology, this program offers two professorships with the intent to foster collaboration and scientific exchange between the United States and India.

**Teaching Professorships** provide microbiologists in India and the United States with an opportunity to visit institutions in the other country to teach an interactive short course on a topic in any of the microbiological disciplines.

**Research Professorships** provide support to microbiologists in India and the United States to conduct a novel research project in partnership with colleague at a research facility in the other country.

Applications should be submitted jointly by the prospective visiting professor and host.

**Funding:** $5,000 per grant.

**Application Deadline:** December 15, 2015

For more information and to apply visit: [www.asm.org/indo-us](http://www.asm.org/indo-us)

**Questions? Please contact ASM at:** international@asmusa.org

Or the IUSSTF at: strikha@indousstf.org
