Framework to Identify Promising Practices

People with IDD may experience complex age-related issues, including dementia-related disorders, at earlier ages than the general population. To address changing needs, the Massachusetts Department of Developmental Services (DDS) formed a multidisciplinary workgroup of disability and aging-related public and private agency partners. The workgroup explored key areas of age-related needs, including end of life care and services; screenings for onset of age-associated changes and conditions; and innovative models and resources to support aging in community settings.

Nationally, the number of adults with IDD aged 60 and older is projected to double to 1.2 million people by 2030\(^3\). In Massachusetts, 1 out of every 4 people served by DDS is aged 55 or older\(^4\).

### Resources for Multiple Audiences

**DDS Resources:**
- Access to expanded clinical consultations
- Life Sustaining Treatment Policy
- Webinars: Includes accessible videos, handouts, and other resources:
  - General Aging with IDD
  - Aging with IDD and Dementia
  - End of Life
  - Five Wishes
  - Launching a Memory Cafe
  - Aging and Disability Resource Consortia

**Innovative Day Programs:** As people with IDD age, they may want to retire or do something different with their days. DDS funded a pilot for innovative alternatives to traditional day, work or community-based activities. Cooperative for Human Services (CHS) is implementing a program that includes activities in shorter time increments than a traditional day program and a mobile “pop-up” approach. Technology will also play a role with CHS using iPads, Nintendo Wii and Facetime for multi-generational interactions, staying connected, exercise, and entertainment.

**Resources for Multiple Audiences**

**Inclusive Memory Cafes:** Memory Cafes are meetings where people with dementia and care partners join together to enjoy a variety of activities. In 2016, DDS funded 13 organizations to pilot Cafes that include people with and without IDD and their care partners. Feedback from the inclusive cafes has been positive.

**Common Goals:**

**End of Life Planning:** DDS updated its Life Sustaining Treatment Policy to clarify DDS principles on Informed Choice, Goals of Care, Dignity and Comfort, Hospice and Life Sustaining Technology use, Do Not Resuscitate Orders and other topics relevant to end of life care. In addition, the 5 Wishes\(^5\) document, along with a webinar training focused on how to discuss end of life care, were issued.
