7. PathSource
Steps to Owning Your Health

1. Locate credible health info & evaluate it?
   Start your search with National Library of Medicine online sites and databases

2. Understand that Health is multi-dimensional
   Balance in each of the dimensions is necessary for health.

3. Use Trusted Wellness Resources and Tools
   Don’t Google! Use these tools instead!

4. Put Knowledge into Practice
   Prepare for medical appointment and communicate effectively with a provider
Health Knowledge
K-12 Performance Indicators
Ability to Advocate for Personal Health

Make requests to promote personal health

Pre-K through Grade 2

Grades 3-5
Express opinions & give accurate info about health

Grades 6-8
Work cooperatively to advocate for individual health

Grades 9-12
Work cooperatively as an advocate for Individual health

Post Secondary Years

"What does a health care provider need to know to take care of me?"
87% have searched online for health information

75% Search for info about a health issue they are dealing with

50% for health issue affecting someone they know

94% say info found “somewhat helpful.”

29% report info “very helpful.”
What are they looking for?

MedlinePlus Teaches How to Evaluate Online Health Information

https://medlineplus.gov/evaluatinghealthinformation.html
Thinking Critically About Online Health Info

• Consider the source -- Use recognized authorities - Know who is responsible for the content
• Focus on quality--All Web sites are not created equal
  - Does the site have an editorial board?
  - Is the information reviewed before it is posted?
• Be a cyberskeptic—Lots of Misinformation
  - Does the site make health claims that seem too good to be true?
  - Does the information use deliberately obscure, "scientific" sounding language?
  - Does it promise quick, dramatic, miraculous results? Is this the only site making these claims?
• Look for the evidence--Rely on medical research, not opinion
  - Does the site identify the author? Does it rely on testimonials?
• Check for currency--Look for the latest information
  - Is the information current? Look for dates on documents
• Beware of bias--What is the purpose? Who is providing the funding?
  - Who pays for the site?
• Protect your privacy--Health information should be confidential
  - Does the site have a privacy policy and tell you what information they collect?

The New and Improved Nutrition Facts Label – Key Changes

The U.S. Food and Drug Administration has finalized a new Nutrition Facts label for packaged foods that will make it easier for you to make informed food choices that support a healthy diet. The updated label has a fresh new design and reflects current scientific information, including the link between diet and chronic diseases.

1. Servings
The number of “servings per container” and the “Serving Size” declaration have increased and are now in larger and/or bolder type. Serving sizes have been updated to reflect what people actually eat and drink today. For example, the serving size for ice cream was previously 1/2 cup and now is 2/3 cup.

There are also new requirements for certain size packages, such as those that are between one and two servings or are larger than a single serving but could be consumed in one or multiple sittings.

2. Calories
“Calories” is now larger and bolder.

3. Fats
“Calories from Fat” has been removed because research shows the type of fat consumed is more important than the amount.

4. Added Sugars
“Added Sugars” in grams and as a percent Daily Value (DV) is now required on the label. Added sugars includes sugars that are either added during the processing of foods, or are packaged as such (e.g., a bag of table sugar), and also includes sugars from syrups and honey, and

sugars from concentrated fruit or vegetable juices. Scientific data shows that it is difficult to meet nutrient needs while staying within calorie limits if you consume more than 10 percent of your total daily calories from added sugars.

5. Nutrients
The current nutrients that are required or permitted on the label have been updated. Vitamin D and potassium are now required on the label because Americans do not always get the recommended amounts. Vitamin A and C are no longer required since deficiencies of these vitamins are rare today. The actual amount in milligrams or micrograms in addition to the %DV must be listed for vitamin D, calcium, iron, and potassium.

The daily values for nutrients have also been updated based on new scientific evidence. The daily values are reference amounts of nutrients to consume or not to exceed and are used to calculate the %DV.

6. Footnote
The footnote at the bottom of the label has changed to better explain the meaning of %DV. The %DV helps you understand the nutrition information in the context of a total daily diet.

For more information about the new Nutrition Facts label, visit: https://www.fda.gov/Food/GuidanceRegulation/GuidanceDocumentsRegulatoryInformation/labelingNutrition/ucm363663.htm

Be an Informed Consumer

When considering Complementary or Integrative Treatment

Decisions about your health care are important—including decisions about whether or not to use complementary health products and practices. Take charge of your health by being an informed consumer. Find out and consider what scientific studies have been done on the safety and effectiveness of the product or practice that interests you. Discuss the information with your health care provider before making a decision. These fact sheets and resources can help you think about the issues to consider and questions to ask.

What’s in My Hair Color or Gel Manicure?

Hair and Nail Salons

What are they?
Hair and nail salons offer cosmetic treatments for men and women. They provide foot, hand, and nail care; nail manicures; haircuts and hair styling; and other services.

Why are they a concern?
Treatments may contain potentially harmful chemicals that can cause irritants among workers, as well as other health concerns. Many chemicals in nail products evaporate into the air, potentially affecting clients as well as workers. Nail polish removers are sometimes abused as recreational inhalants to get high.

Inhalation of some nail products may irritate the eyes, nose, and throat. Some products may react to light or to other substances, which can cause skin irritation. Some ingredients are volatiles that can cause allergic reactions.

Salon workers may be exposed to fumes if they use hair sprays or lotions. This can cause allergies. Hair sprays are flammable and contain a variety of chemicals.

Who is at risk?
- Salon workers, owners, and clients are at risk.
- Children are especially at risk if they are exposed to or accidentally drink nail polish removers and artificial nail removers.

“Communication

“The single biggest problem in communication is the illusion that it has occurred.”

—George Bernard Shaw
Preparation, Engagement and Asking Questions

Tips to Stay Engaged
- Take a friend or family member with you
- Write things down
- Repeat back what you’ve heard
- Ask questions

3 Types of Questions
- **What** is this test for?
- **What** are my choices?
- **Why** do I need this treatment?
- **Why** do I need to decrease how much salt I eat?
- **How** often do I need to take the medication?
- **How** do you spell the name of that drug?
Congratulations
You Now Have Lots of Resources to Help Young Adults Own Their Health!!!
Claiming MLA CE Credits for this webinar

Congratulations You have successfully completed Owning Your Health

Complete an evaluation and claim an MLA Certificate of Credit for your participation

Enrollment code: young19

You have 60 days from the date you completed the course to complete an evaluation and claim credit.

   - Login. If you do not have a current MLANET login, Register as an MLA guest.
   - After you’ve set up your MLA account and you’re logged in to MLANET, click MEDLIB-ED on the navigation bar to return to MEDLIB-ED.
2. Click My Learning on the blue bar near the top of the MEDLIB-ED home page.
3. Enter young19 as the enrollment code. Complete the evaluation & claim credit.
4. To learn more about MEDLIB-ED, please see the FAQ in the About menu.
5. For questions, please email MEDLIB-ED@mail.mlahq.org.
