- Q&A
Project Overview

NLM is actively engaged in reaching a strategic goal to “reach more people in more ways through enhanced dissemination and engagement pathways.”

By holding a Wikipedia Edit-a-thon, we can:

- Make it easier to get credible, evidence-based health information
- Disseminate NLM sources and increase their reach
- Leverage network members’ expertise, experiences, and audiences
- Engage NNLM members nationwide

#citeNLM
How to Participate

Step 1: Create a free account on Wikipedia

Step 2: Register on our campaign dashboard

Step 3: Find an article that needs a citation

Step 4: Cite a source

Step 5: Share!
Join the #citeNLM Fall 2019 dashboard!
The National Network of Libraries of Medicine (NNLM) is a program coordinated by the National Library of Medicine (NLM) and carried out through a nationwide network of health science libraries and information centers. NNLM’s mission is to advance the progress of medicine and improve public health by providing all U.S. health professionals with equal access to biomedical information and improving the public’s access to information to enable them to make informed decisions about their health.

The objective of #citeNLM is to improve the credibility and content of information on medicine and health-related articles on Wikipedia.

This guide is intended to help you organize a #citeNLM editathon at your organization during our Fall or Spring campaign periods.

If you have any additional questions after reading the guide please visit our project website or contact your NNLM region.

#citeNLM Wikipedia Edit-a-thons

Wikipedia’s health topics pages are visited a staggering 7 billion times a year, making it possibly the world’s most popular health information resource. The objective of #citeNLM is to improve the credibility and content of medical and health-related articles on Wikipedia by adding citations and information from National Library of Medicine (NLM) sources.

NLM is actively engaged in reaching a major strategic goal to “reach more people in more ways through enhanced dissemination and engagement pathways.”
