Conducting Focused Outreach with Patient Populations

Margot Malachowski, MLS, AHIP (she/her), Education and Outreach Coordinator
Network of the National Library of Medicine, New England Region at Lamar Soutter Library, UMass Medical School, Worcester, MA

ABSTRACT
Focused Outreach techniques developed by the Network of the National Library of Medicine—New England Region may be applied by hospital librarians interested in working with patient populations. This poster includes the principle techniques employed in community outreach projects, as well as suggestions for the application of these techniques for hospital librarians interested in conducting or supporting outreach to patients.

BACKGROUND
Burgeoning efforts in participatory care and the inclusion of patients in the decision-making process pose a unique opportunity for librarians and information professionals to offer more personalized information services. DeRosa, et al. 2019 DOI: 10.5195/jmla.2019.652

FOCUSED OUTREACH TECHNIQUES
• Conduct Key Informant Interviews
• Review Publicly Available Data
• Develop Outreach Strategies

APPLICATION TO PATIENT POPULATIONS
• Work with selected interviewees to identify the target population and health information focus.
• Learn about the information-seeking habits of target patient population.
• Develop a strategy to address a specific need.
