Developing an e-Science Portal for Librarians to Support Learning and Collaboration
Donna Kafel, Project Coordinator, NN/LM New England Region, University of Massachusetts Medical School

Based upon feedback from an e-Science symposium and a portal needs assessment, librarians wanted a “one-stop shopping” centralized e-Science resource geared towards them.

While e-Science holds promise for accelerating discovery and expanding the reach of research, the rapid generation of immense data sets, evolving digital technologies and lack of standards are ongoing barriers to data access. Recognizing these challenges, research libraries are looking for new models and methodologies for library management of digital research data. Ongoing continuing education and presentation of current data management projects are needed to support effective librarian engagement in e-Science. The New England e-Science Portal for Librarians is a centralized resource developed to meet the on-going educational, informational, and collaborative needs of New England science and biomedical librarians.

Portal Scope Statement
The e-Science Portal will be a central resource for librarians to learn about and discuss issues related to e-Science, e-Science subject areas, and the impact of e-Science on the profession. The portal will primarily serve librarians and library administrators working in institutions that are generating, sharing, storing and/or using data for basic scientific, clinical, or translational research in the health, biological, and physical sciences. As such, the portal will bring together resources on education, outreach, and collaboration, best-practices, and current events for e-Science. The portal will provide librarians with the tools, knowledge, and skills to effectively participate in networked science.

A Collaboration between UMass and other New England Librarians
Advisory Board:
Rebecca Reznik-Zellen, Chair (UMASS Amherst)
Javier Crespo (NN/LM for New England)
Sally Gore (UMMS), David Lapointe (UMMS)
Donna Kafel (UMMS)
Beth Schneider (Mass. General Hospital)
Howard Silver (MIT)
Karl Swanson (Yale)
Jennifer Woodward (Genzyme)

Editorial Board (in development)
Regina Raboin (Tufts), Amy Stout (MIT)
Maxine Schmidt (UMASS Amherst)
Jen Ferguson (Brandeis)
