Baystate Medical Center Department of Psychiatry
University of Massachusetts Medical School - Baystate

Who We Are

The Child Partial Hospitalization Program (CPHP) at Baystate Medical Center is an acute day treatment program that offers a full range of clinical services within a highly-structured setting for up to 36 children and adolescents (ages 5-18) in need of psychiatric crisis intervention and stabilization.

Partial Hospitalization Level of Care:
- Risk of harm to self
- Aggression
- Psychosis without current unsafe behaviors
- Failure in lower level of care
- Step-down from inpatient or 24-hour/day psychiatric care (eg: CBAT)

CPHP Treatment Model

Patients attend program Monday-Friday 8:45am-2:30pm
Average Length of Stay = 11.5 days
Treatment model is based on principles of:
- Trauma-informed care
- Collaborative Problem Solving
- Other Evidence-Based Interventions (CBT, DBT, etc.)

CPHP Treatment modalities include:
- group psychotherapy
- psychoeducational groups
- recreational therapy
- onsite academic tutoring
- psychiatric medication consultation
- family engagement
- case management
- discharge planning

Goals for treatment:
- stabilization of high-risk symptoms
- comprehensive assessment
- referral to appropriate services

Common Referral Diagnoses:
- ADHD, ODD, and Disruptive Behavior Disorders
- Depression
- PTSD and Adjustment Disorder
- DMDD and Bipolar Disorder
- GAD, Separation Anxiety & Panic Disorder
- Psychotic Disorders
- Somatic and Conversion Disorders

Population Served

Approximately 700 patients admitted annually

Current Challenges & Initiatives

- Incorporating evidence based practices
  - Standardized trauma assessment
  - Evidence-based suicide assessment
  - Collaborative Problem Solving (CPS)
  - Standardized outcome measurement
- Wait-list management
  - 1400 annual referrals, 700 annual capacity
- Managed Care pressures resulting in decreased length of stay

Opportunities for Collaboration

Within this context, the CPHP is enthusiastically seeking research collaborators who share similar interests in completing applied research with this diverse, at-risk, and underserved population.

Goals of clinical relevance to the program which may be appropriate for applied research investigation include:

- **Improving safety**
  - seclusion and restraint
  - staff injury
  - suicidal behaviors
  - self-harm incidents
  - aggression
  - substance abuse
- **Improving patient outcomes**
  - readmission rates
  - successful transition to lower levels of care
  - decreased symptomatology
  - improved functioning
- **Staff Engagement**
  - decreasing burnout
  - vicarious trauma
  - staff recruitment and retention
