Expanding Data Management Service Boundaries at Johns Hopkins University

David S. Fearon | JHU Data Management Services | Johns Hopkins University Libraries | datamanagement@jhu.edu | dms.data.jhu.edu

Supporting OSF collaboration & data sharing platform

Johns Hopkins University Data Archive

Archiving workflow development collaborating with the DataConservancy & COS...

Johns Hopkins Data Management Services

Our Services

- Assistance with data sharing & data management plans
- Archive research for sharing & preservation
- Best practices for data management and sharing

New online training on preparing data management plans

freely available to our RDM community & your researchers

“Train the trainer” licensed materials

Library RDM services can consider purchasing domain and expertise area trainings vs. building from scratch. Available soon:

Sharing Human Subject Data: How to Protect & Remove Identifiers

- Locating identifiers
- IRB & consent forms
- Quantitative & Qualitative data
- Sharing publicly available datasets

De-identification actions

- Remove direct identifiers not needed for analysis
- Replace identifiers with codes e.g., names w/ pseudonyms
- Remove, broaden or mask direct & indirect identifiers when possible e.g., change specific values to ranges: 52 -> 50-55
- Find & remove or mask all potential indirect / inferential identifiers
- Apply advanced statistical de-identification techniques if needed, seek professional assistance & disclosure risk review.

“Safe Harbor” at minimum

Curating & Archiving Research Software

DMS CLIR Postdoc Fellow Fernando Rios developed best practices for documenting, preserving, and archiving research software.
