Kelechi Adejumo, MS

Carla Caraballo  Lowell Community Health Center
Ronnie Mouth
Why asthma? Why Lowell?

– High asthma rate
– Diverse community
– Community health & PHA partners
– Novel intervention research with asthmatic seniors
# Asthma Prevalence Rates in Lowell by Age-Group

<table>
<thead>
<tr>
<th>Age Group</th>
<th>Prevalence in Lowell</th>
<th>95% CI-Lo</th>
<th>95% CI-Up</th>
</tr>
</thead>
<tbody>
<tr>
<td>Children (5-14)*</td>
<td>13.01</td>
<td>12.40</td>
<td>13.63</td>
</tr>
<tr>
<td>Adults (18-64)**</td>
<td>15.9</td>
<td>12</td>
<td>19.9</td>
</tr>
<tr>
<td>Adults (65+)**</td>
<td>13.6</td>
<td>6.6</td>
<td>20.7</td>

</table>

*Pediatrics Asthma Surveillance, 2008-2009;  
**Massachusetts Behavioral Risk Factor Surveillance System, 2011  
*Prepared 01/13/2014 by Massachusetts Department of Public Health*
Project Goals:

Home assessments (90)
Home interventions (90)
Evaluate home intervention effectiveness
Disseminate findings
Partners & Roles

- University of Massachusetts Lowell
- Lowell Community Health Center
- Lowell Housing Authority
Who are we enrolling?

- Live in Lowell Public or Assisted Housing
- Age 62+
- Current Asthma or
- Asthma Diagnosis & COPD
- Low Income
What is Asthma?

- A serious & sometimes life-threatening respiratory disease
- Affects the quality of life for millions of Americans
- No cure for Asthma yet
- Can be controlled through medical treatment & management of environmental triggers
• Americans spend up to 90% of their time indoors.
• Indoor concentrations of most pollutants are higher than outdoor.
Indoor Environment and Asthma

• Indoor allergens and irritants can play significant roles in triggering asthma attacks
  – Ex: pet dander, mice, cockroaches, dust mites, harsh chemicals, fragrances, smoke, moisture/mold, pollen

• Important to recognize potential asthma triggers & reduce exposure
Home Intervention - Assessment

- Health/environmental assessments
  - Health questionnaires
  - Urinary cotinine
  - eNO (Niox Mino)
  - Environmental walk-through assessment
  - Environmental questionnaire
  - Dust sampling
  - NO2 sampling (gas stoves)
Education, Supplies, Intervention

Based on findings from assessment:

• **Education**
  - Dust mites and healthy cleaning practices
  - Pets
  - Avoiding pests
  - Moisture/mold control
  - Smoking
  - Air pollution (indoor & outdoor)

• **Supplies**
  - HEPA vacuum
  - Allergen-proof mattress and pillow covers
  - Trash can with lid
  - Food containers
  - Non-toxic cleaner
  - Baits and traps for pests

Assessment → **Education, Supplies, Remediation** → Mid-term Assessment (6th month) → Final Assessment (12th month)
Education, Supplies, Remediation Cont.

- Remediation
  - Gas stove replacement
  - Install & repair ventilation
  - Integrated Pest Management (IPM)
  - Industrial cleaning
Mid-term Assessment

- Health questionnaire (abbreviated)
- Environmental questionnaire (abbreviated)
- More supplies if needed
- Reinforce education

Diagram:

- Assessment
- Education, Supplies, Remediation
- Mid-term Assessment 6th month
- Final Assessment 12th month
Final Assessment

- Health questionnaires
- Urinary cotinine
- eNO (Niox Mino)
- Environmental questionnaire
- Environmental walk-through
- Dust sampling
- NO2 sampling (gas stoves)
- Gift certificate
Results

Table 1. Demographics of participants

Environmental Exposures Asthma Triggers - Smoking

<table>
<thead>
<tr>
<th></th>
<th>(n=46)</th>
<th>Percent (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject smokes</td>
<td>11</td>
<td>23.9</td>
</tr>
<tr>
<td>Others in household smoke</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>Visitors smoke</td>
<td>6</td>
<td>13</td>
</tr>
<tr>
<td>Smoke enters from other apartments/outside</td>
<td>12</td>
<td>26.1</td>
</tr>
</tbody>
</table>
Conclusion

- Prevalence of environmental asthma triggers
- Difficulties with exhaled Nitric Oxide (eNO) measurement using Niox Mino device
- Recruitment challenges
- Involve key partners to increase impact
- Importance of multi-cultural, multilingual lay community health outreach workers
