MANIPULATING THE GUT MICROBIOME FOR HUMAN HEALTH

MODERATORS
Beth A. McCormick, Ph.D. Department of Microbiology & Physiological Systems
UMass-Worcester (UMMS)
Jeffrey Blanchard, Ph.D. Department of Biology
UMass-Amherst
Microbes R Us
Bacterial cells outnumber your body cells 10:1 and comprise up to 4-6 lbs of your body mass.
Microbiome: Role in Health and Disease

Bowel diseases

Carcinogenesis

Obesity

Gut microbial balance

Host physiology

Metabolism

Immune function
Discovering novel microbialis for disease prevention and treatment

**Director:** Beth A. McCormick, Ph.D. UMass-Worcester
**Co-Director:** Jeffrey Blanchard, Ph.D. UMass-Amherst
**Co-Director:** Randall Pellish, M.D. UMass-Worcester
CMR Mission

- Define the interactions between the host, the microbes, and the unique environments that drive these ecological systems

- Discovery of novel microbials for disease prevention and treatment
Natural synergy
Gut microbiome and its role in health and disease

• C. difficile infection:
  – Clinical gut manipulation: Dr. Randy Pellish, MD
    Department of Medicine (Division of Gastroenterology), UMMS
  – Fecal Transplantation
  – Basic research approach: Dr. Vanni Bucci, Ph.D.
    Department of Biology, UMass-Dartmouth
  – Antibiotic Treatment

• Intestinal Disease:
  – Clinical gut manipulation: Barbara Olendzki, R.D., L.D.N.
    Center of Applied Nutrition, UMMS
    - Dietary Interventions
  – Basic research approach: David Sela, Ph.D
    Department of Food Science, UMass-Amherst
    - Probiotic Delivery
